**Evolving Career Opportunities in IT/ITES
&
Future Skills for Young Engineers**

21 April, 2022
3:00 - 4:15 PM

Technology is dramatically changing the job market, rapidly replacing many jobs that are currently existing and creating new ones. These changes are accelerated by a series of economic, social and technological growth and triggered by the global pandemic. The IT/ITES sector is playing an important role in the growth of India by generating huge job opportunities for fresh talent coming out of colleges. The Indian IT/ITES sector crossed \$200 billion in total revenue and five million in total workforce in 2022.

Like the other industries, the growth of IT/ITES is also challenged by the existing skill gap between the industry and academia. Faced with a very high attrition rate, it has been taking various measures including upskilling and reskilling of its existing employees. In this context, this webinar for college students and educators will focus on the following:

- The future of work - emerging mega trends in IT/ITES
- The future skills - new skills for future talent
- Evolving career opportunities in IT/ITES
- Leveraging technology to enhance learning
- Developing deployment ready professionals
- Preparing the next gen while they are at campus
