It is impossible to engineer something without the help of mathematics. Since the applications of mathematics in engineering are so vast and varied, it is not possible to summarize them.

Engineering + Maths = Everything

Engineering - Maths = Nothing

Summary of the programme

The objective of the Bridge course is to demystify what is expected of students in Pre College level classes and to provide adequate foundation in the core applied science subjects and English limited to moderate level so that students do not face any difficulty when the classes commence. Induction Programmes and Bridge courses conducted by the different departments at the beginning of the academic year are an effort on our part to fill-in the chasm that exists between the shared knowledge of students at the entry-level and the course requirements.

The sessions also include yoga, Sports and Cultural Activities for all round development. During this interaction of few days with the faculty, the students will come out of their hesitation and it will be the best platform for the students to interact with the faculty members, making it responsible for them to build strong relationships with faculty, advisers and other students. Fresher's Induction programme conducted from 18.10.2021 to 06.11.2021. Each batch of student was attended online class and teacher teaches very effectively. The statistics show that, there is a gradual improvement of more than 20-30% in the overall performance of the students. Their parents have also deeply appreciated. To phase in students to Engineering and enjoy education, overview through project based learning is also envisaged.

We sincerely thank the resource persons from various institutions, the management, principal, vice principal, HoD and staff members of various departments, participants from various departments for the successful conduct of the bridge course.

BRIDGE COURSE

Summary of the programme

The objective of the Bridge course is to demystify what is expected of students in Pre College -level classes and to provide adequate foundation in the core applied science subjects and English limited to moderate level so that students do not face any difficulty when the classes commence. Induction Programmes and Bridge courses conducted by the different departments at the beginning of the academic year are an effort on our part to fill-in the chasm that exists between the shared knowledge of students at the entry-level and the course requirements.

The sessions also include yoga, Sports and Cultural Activities for all round development. During this interaction of few days with the faculty, the students will come out of their hesitation and it will be the best platform for the students to interact with the faculty members, making it responsible for them to build strong relationships with faculty, advisers and other students. Fresher's Induction programme conducted from 1.10.2020, 5.10.2020 to 8.10.2020 Bharathi Baskar talk about Motivation & Attitude, Subramania Natarajan talk about Entrepreneurial perspective, Anbuthambi talk about industry perceptive. Nanda Kumar IRS talk about career Perspective, Shveta Vishwanath talk about Alumini perspective and bridge course was conducted this from 26.10.2020 to 31.10.2020 for five batch of students . Each batch of students was attended online class and teacher teaches very effectively. The statistics show that, there is a gradual improvement of more than 20-30% in the overall performance of the students. Their parents have also deeply appreciated. To phase in students to Engineering and enjoy education, overview through project based learning is also envisaged

We sincerely thank the resource persons from various institutions, the management, principal, vice principal, HOD and staff members of various departments, participants from various departments for the successful conduct of the bridge course

ABOUT NANDA KUMAR IRS AT INDIAN REVENUE SERVICE (IRS)

Nandakumar, who is now an assistant director, investigation department, in the income tax office at Nungambakam, has become a role model for the city's IAS aspirants, who usually throng his office for advice.

The childhood of this 2004-batch IRS officer was not a bed of roses. He was a school dropout. "I once sold lottery tickets, worked in mechanic shops, as well as television and radio repair centres. Initially I enjoyed the routine as there was no homework and I did not get scolded by teachers. But later, my friends' parents did not allow me to mingle with them. That was the turning point," he informs.

After battling dyslexia, Nandakumar secured 52 per cent in his 12th standard examinations. He knocked the doors of many colleges but was denied admission. Finally, he got admission to the English literature course at the Dr Ambedkar Arts and Science College.

"I was an average student and it was difficult to follow English but I worked hard and I was the only one who passed out of college with distinction in English literature," he recalls. In 1997, Nandakumar started preparing for the UPSC examination. With sheer determination, he cracked this tough examination and now holds a prestigious post.
