Place: PG BLOCK

The students of Classes UG and PG actively participated in Interhouse Clay Modeling competition conducted on 08.02.2018. The students made models based on the given topic with clay. The Topics for UG were Animals, Marine life and Birds while for PG Girl education and Forest Scene. The students used their imagination and creativity to make and decorate the models made from clay. The students worked enthusiastically and efficiently to fulfil their heart's desires and fantasies. Manipulation with clay provided an outlet for children to physically convey their emotions and reduce stress. They pounded, squeezed, rolled and blended the clay to make some unique and amazing creations. This outstanding sensory activity enhanced dexterity, gross and fine motor skills and helped to boost the self-confidence of the students. It promoted problem solving skills as they experimented with the building techniques and adapted to changes along the way. The finished product at hand was a treasure to cherish for the young ones. They experienced the feeling of accomplishment and satisfaction. Playing and crafting with clay being children's favourite activity, they learnt basic shapes and techniques, and gained mastery of moulding. It was a great way to develop imagination and sparkle creativity to think out of the box.....!!

The students of Classes UG and PG actively participated in Interhouse Clay Modeling competition conducted on 08.02.2018. The students made models based on the given topic with clay. The Topics for UG were Animals, Marine life and Birds while for PG Girl education and Forest Scene. The students used their imagination and creativity to make and decorate the models made from clay. The students worked enthusiastically and efficiently to fulfil their heart's desires and fantasies. Manipulation with clay provided an outlet for children to physically convey their emotions and reduce stress. They pounded, squeezed, rolled and blended the clay to make some unique and amazing creations. This outstanding sensory activity enhanced dexterity, gross and fine motor skills and helped to boost the self-confidence of the students. It promoted problem solving skills as they experimented with the building techniques and adapted to changes along the way. The finished product at hand was a treasure to cherish for the young ones. They experienced the feeling of accomplishment and satisfaction. Playing and crafting with clay being children's favourite activity, they learnt basic shapes and techniques, and gained mastery of moulding. It was a great way to develop imagination and sparkle creativity to think out of the box.....!!
